Edinburgh Critical Edition of the Selected Writings of Andrew Lang, Volume 1—Lang Andrew Lang
2015-05-22 The Selected Works of Andrew Lang: Volume 1 Anthropology: Fairy Tale, Folklore, the Origins of Religion, Psychical ResearchEdited by Andrew Teverson, Alexandra Warwick and Leigh Wilson
This is the first critical edition of the works of Andrew Lang (1844-1912), the Scottish writer whose enormous output spanned the whole range of late-nineteenth century intellectual culture. Neglected since his death, partly because of the diversity of his interests and the volume of his writing, his cultural centrality and the interdisciplinary nature of his work make him a vital figure for contemporary scholars. This volume covers Lang’s wide and influential engagement with the central areas of late-nineteenth-century anthropology. Lang made decisive interventions in debates around the meaning of folk tales and the origins of religion, as well as being an important figure in the investigation of supernatural beliefs and practices.

Selected Letters of Alessandra Strozzi, Bilingual edition—Alessandra Strozzi 1997-03-10 The letters of Alessandra Strozzi provide a vivid and spirited portrayal of life in fifteenth-century Florence. Among the richest autobiographical materials to survive from the Italian Renaissance, the letters reveal a woman who fought stubbornly to preserve her family’s property and position in adverse circumstances, and who was an acute observer of Medicean society. Her letters speak of political and social status, of the concept of honor, and of the harshness of life, including the plague and the loss of children. They are also a guide to Alessandra’s inner life over a period of twenty-three years, revealing the pain and sorrow, and, more rarely, the joy and triumph, with which she responded to the events unfolding around her. This edition includes translations, in full or in part, of 35 of the 73 extant letters.

Selected Poems: Expanded Edition—Robert Lowell 2006 Presents a selection of more than two hundred works culled from the acclaimed poet’s books of verse, including Lord Weary’s Castle, The Mills of the Kavanaughs, Life Studies, For the Union Dead, Near the Ocean, and others.

The essays touch on many different themes, in particular the social and economic dimensions of science. Petrochemicals, pharmaceuticals, synthetic fibres, fertilisers and pesticides, paints and dyes-stuffs constitute over 65% of the market. The remaining 15% represents a wide range of chemical intermediates and industrial or specialty chemicals which have a market of over Rs 240 bn (including imports of about Rs 35 bn). Against the growth dynamics of the chemical industry as a whole, the industrial chemicals segment covering intermediates and specialty chemicals witnessed a somewhat sluggish growth in recent years. Thereafter some upward trend was in evidence as a con-sequence of a rally in user industries like rubber, leather, food processing, textiles especially man-made fibres and fabrics. Downstream industries like chlorinated benzenes, cosmetics and pesticides also registered positive trends. The industry has remained among the fastest growing sectors of the economy. The chemical industry remains concentrated in the western region, which claims a near 50% share of investment flows. In the western region, Gujarat makes the largest contribution to the chemical industry’s production activity. This book provides detailed project profiles of important chemical industries. Research scholars, professional students, scientists, new entrepreneurs, and present manufacturers will find valuable educational material and wider knowledge of these 9 selected chemicals in this book. **Selected Decisions, 13th Edition** International Monetary Fund 1990-04-30 This paper presents several IMF’s selected decisions of the Executive Board and selected documents. The Executive Board approves the draft Guidelines for Determining the Amount of Reserve Assets to Be Paid in Connection with Subscriptions set forth. These guidelines shall be considered by a Committee of the Executive Board established to consider an application for membership in the IMF or to consider a request for an increase in quota that is made outside the framework of a general review of quotas. The amount of the subscription to be paid in reserve assets shall be determined in the light of all the payments of reserve assets made by existing members and the country's external reserve position at the time of membership. Considering the asset payments made by all members in connection with the Sixth General Review of Quotas and adding them to the sum of asset payments taken as the equivalent of 25 per cent of total quotas as of the date of the Second Amendment, the reserve asset payments made by all members average 20 per cent of present quotas.

These guidelines shall be considered by a Committee of the Executive Board established to consider an application for membership in the IMF or to consider a request for an increase in quota that is made outside the framework of a general review of quotas. A reasonable approximation of the amount of the subscription that has been paid in reserve assets in the past is the average of all reserve assets actually paid in terms of the quotas of all members, rather than the proportions paid in the past by individual members. In determining the amount of the reserve asset payment, account should also be taken of the effect the size of such payment would have on the remuneration that might be payable to the new member.
